

## Evaluation Answers by Question

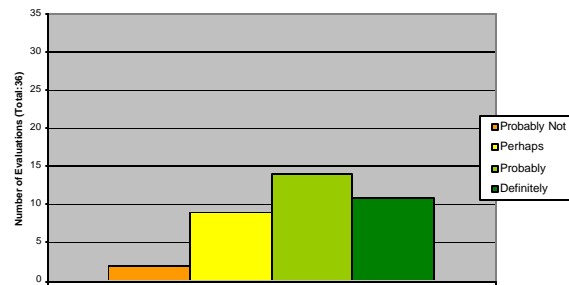

Question 1: Were most of your issues and questions about TMDL Implementation addressed?

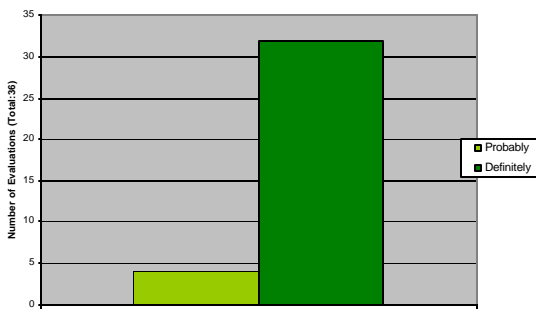

Question 2: Do you think the agenda of the workshop allowed opportunities for you to express your concerns and questions?

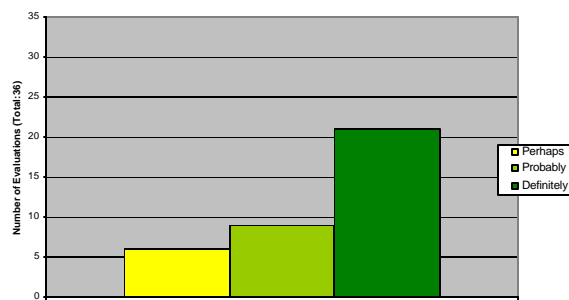

Question 3: Do you think the organization, location, and format of the workshop allowed the expression and discussion of your concerns and questions?

Question 4: Do you feel today's workshop provided you with applicable tools and assistance that can be easily utilized in your watershed efforts?

Question 5: Was it helpful to interact with individuals involved in other watershed efforts across the region?

Question 6: Would you attend a TMDL workshop like this again?

## Selected Comments from Evaluations:

- Excellent - wonderful food, nice facility, sound during breakouts loud. Thank you.
- Great (organization, location, format) in the library with the small group - not in large room - couldn't hear, too much noise from other groups.
- Program facilitators conducted program in a professional manner.
- Would like to have session offered in middle of Shenandoah Valley (triangle from New Market/Edinburg to Luray). Great lunch and breakfast snacks.
- Cows and decreasing, humans increasing. Yet Ag. Is the primary focus. Had difficulty injecting urban residential issues...Great gathering. Invaluable exchanges made possible by your planning and the remarkable quality of the participants who attended.
- This is a great facility to hold a meeting but I found it a little hard to hear some of the speakers in the break-out sessions; especially in the main room where 3 groups were meeting at one time.
- Good job you all! Thanks! I got a lot of good info out of today's talks! Good job with the cowbell and keeping the agenda on time. Beautiful building but very difficult to hear the soft-spoken in the break-out groups.
- Thanks for the opportunity to listen, learn and be heard!
- Thank you - lunch great - beautiful, informative people
- Since as many programs interact (TMDL, Trib Strategy), it was kind of hard to keep people focused just on TMDL. I'm not saying that is good or bad, but ... keep that in mind for future workshops.
